DETAILED ACTION

Status of Application, Amendments, and/or Claims

1. The Amendment was received and entered. Claims 16 and 17 were canceled by amendment. The claims pending in this application are **Claim(s) 1-15 and 18-26**.

Election/Restrictions

2. Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, select to a restriction requirement pursuant to 35 U.S.C. 121 and CFR 1.141 et seq. Nevertheless, to further aid the biotechnology industry to protecting its intellectual property without creating an undue burden on the Office, the Commissioner has decided sua sponte to partially waive the requirements of 37 CFR 1.141 et seq. and permit a reasonable number of such nucleotide sequences to be claimed in a single application. See examination of Patent Applications Containing Nucleotide Sequences, 1192 O.G. 68 (November 19, 1996).

Due to the ever expanding size of databases and the high burden on the Office resources in searching sequences, the Office has determined that **ONE** primer pair constitutes a reasonable number for examination purposes. Therefore, **applicant is required to select ONE PRIMER PAIR and identify the selected pair by SEQ. ID. NO. Identifier.** Examination will be restricted to only the one elected primer pair.

CONCLUSION

3. Claims 1-15 and 18-26 are subject to election for the reasons set forth above.
